

Fundamentals of Retail E-learning Suite

Background

Whether sales, marketing, consulting, development or implementation, the vendors whose people know their customer's industry achieve better results than those that don't. It can take years for new staff to absorb the required level of knowledge when learning on a project by project basis. Martec designed this program to help technology companies accelerate this process. Retail Fundamentals started life as an instructor-led program nearly 30 years ago and was first delivered as e-learning in 1999. Since then it has been polished and refined every year to become the most used retail industry training program in the world. Over 7,000 people have studied this program and used it to improve their sales, marketing or delivery performance.

Why do this as an e-learning class? For several reasons:

- An individual can be trained when they join the company rather than when there are enough new hires to support an instructor-led class.
- It's cost effective to train one person at a time.
- Account managers do not need to take time away from selling to study the program. They can work it around their customer commitments.
- There are companion classes to teach a comprehensive understanding of retailing and how to use that retail knowledge to practice solution selling more effectively. These collectively help account managers be more successful.
- There are no associated travel and lodging expenses.
- Account managers can re-visit the content to help them in specific situations as need arises.

Target Audience

- Anyone who needs to understand the terminology, organization structures, responsibilities, financials, key performance indicators, key business processes, use of IT and key trends across retail to better sell to and support their retail customers.

Objectives of the Suite

By the end of this program participants will be able:

- To explain the key retail trends and retail formats
- To describe the key processes in a retail business and how they fit together
- To describe a typical retail organization structure and the likely business pains for each executive
- To calculate and interpret all the main retail Key Performance Indicators
- To explain how retailers make their money and the main elements that are impacted in a return on investment calculation
- To explain the architecture of retail applications and use techniques such as quadrant analysis to identify opportunities in a retail business
- To explain the main business processes in each main area of the business, namely buying and merchandising, store operations, supply chain management, e-commerce, marketing, finance and human resources.

Course Overview

The Fundamentals of Retail Suite is a self-paced set of 10 web-based training programs. All a student needs to run the program is access to a PC and a web browser. The suite is hosted on the Retail Development Academy's Learning Management System and offered at a one-time fee of \$405 (£324 and €373) per student. Upon payment, an account number and password are issued, which is valid for 1 year. The program takes about 10 to 12 hours to study depending on the student and their diligence. Individual study sessions are recommended to last no longer than 30 minutes. Within the purchased period, students can re-visit the material as often as they wish. Each module can be purchased separately at a cost ranging from \$45 to \$68 per student (depending on module) for 1 year's access. Individual modules take about 1 hour each to study.

Companies may also purchase a corporate licence which provides unlimited access within the company's own organization. Prices are available on request.

Program Contents

1. Retail Background and Trends

What is retailing?

Retail formats

- Department stores
- Mass merchants
- Large format specialty
- Small format specialty
- Food and drug
- Home shopping

Key retail trends

- Omni-channel retailing
- International expansion
- Customer engagement

Store Operations - Strategy and Tactics

The main functions of the store ops department are to develop the store operations strategy and then to operate this strategy consistently in stores. This is the tactical day-to-day running of the store. No matter how good a retail strategy is, without good execution by the store operations team in each of the stores it will not be successful.

The key responsibilities of Store Operations teams in stores are:

- Selling and check out
- Site selection
- Customer service (this also includes service to customers who are

Develop store operations strategy

Operate strategy consistently

Staffing levels, time, attendance and labor scheduling

Without good execution of the retail strategy by the store operations team it will not be successful.

10. Retail Marketing

Marketing structure

Marketing KPIs

Marketing activities

Customer Relationship Management

- Loyalty vs retention
- Customers are not created equal
- Spending by decile
- Strategic CRM
- Segmentation by customer
- Customer analysis

Summary

Mastery test

The screenshot shows a presentation slide titled "Strategic CRM" from a course by Martec International. The slide features a four-stage evolution of CRM: Stage 1 (Operational CRM), Stage 2 (Marketing Automation), Stage 3 (Analytical CRM), and Stage 4 (Strategic CRM). A central bubble lists "Business operating areas" as "analysis of what each does and how it does it" and "implement a more customer focused approach". The slide also includes a navigation menu on the left and a footer with "The growth of e-commerce" and navigation buttons.

Testing

At the end of each module there is a test of the participant's knowledge. Test scores are recorded in the Learning Management System and are available to management to review achievement. Certificates are awarded based on satisfactory pass marks.

Job Aids

Various classes also have downloadable performance support job aids and checklists to assist students after the class.

Martec International

Martec International is a leading consulting and training firm specializing in the retail industry. Its client base includes retailers from around the globe, technology suppliers to retail and manufacturers of consumer packaged goods and consumer durables. Martec's professional staff are all former retailers with at least 10 years retail experience and have held at least one management position in a significant retailer. Martec's training portfolio includes instructor-led classes, e-learning programs and blended learning solutions.
